It's okay. I really wanted to like this game, and got sucked in by some of the hype: it has so many good things going for it, and it really shows what games can be as an artform - but gameplay is just so bland. Running and gunning bullet sponge enemies. Not really all that engaging. Terrible ai, mediocre platforming, and puzzles that really seem like a missed opportunity.

Lots of cinematics, awesome effects, live action videos, a great cast, and an interesting sci-fi story - would have been better as a movie.

Running the game is also pretty demanding - you probably need a 970 or 980+ to run this game smoothly.

This is a game for people who don't care about bad gameplay and just want a story. Didn't want to finish it, and regret the purchase.. Max Points 1 - 10

Movie-ready story for cinema. Famous actors in game. Simple gameplay.. Great game, story, graphics, I loved that.. This is just a rip-off of previous innovations introduced by similar games, the movie parts are more interesting than the lame shooting sequences. There's nothing new nor engaging about this game. Not sure why it has got such a high rating on Steam when everywhere else it's average...
. This game is simply amazing! I can't believe some reviews rated it so poorly. The game itself it's just gun shooting with some time bending powers, but in my opinion it doesn't need anything more than that. It's a story driven game and it achieves superbly in telling the story.
You get a short episodic TV-show and a game with some minor choices, all mixed together. I can't wait for the sequel, if it ever gets one. (Microsoft doesn't seem to be interested in that and without their consent, there will be no game)

So, it's been a long time since I wrote a review and when I finished Quantum Break I felt that I needed to leave some words about this great game.

I read some reviews and everyone's talking about the gunplay and story but nobody is talking about how awesome this game runs on low-end pc, it really surprised me because I have a humble GTX570 and I managed to run it on 1080p, some things on high and 30fps cap. Besides the game is really beautiful, I'm impressed about the good work Remedy Studios put on this game, technically speaking.

About the game itself, it's fun but there's no challenge, I played it on hard and I found it very easy. Gunplay is like GTA and time powers really helps you A LOT, you can even know where your enemies are. Overall it was fun.

. weak platforming and shallow, repetitive gunplay mar a mediocre time travel conspiracy story. You know what, I am having a hard time to finish this game. No option for motion blur disable, I am having a motion sickness.
