I was about to say buy DLC for reticule but wait, there already is one. Worst practice ever.. This reminds me of Alan Wake, looking for treasures in ghostly tombs.. Lara looks like a professional raider in this skin.. best looking skin out the dlc's. Given some of the cold locations in this game I'm sure Lara would appreciate a jacket however given this is just a game it is purely a pointless visual change. Also this outfit does not get damaged as the game progresses in the way the default outfit does.. It's cool to be able to change skins for your character but make it unlockable and add special abilities. For this skin, the ability could be infinite pistol ammo and unlocked by killing a certain number of combatants with the pistol.. DLC verdict: Don't get it OR Get it in the bundle with the base game Comment: It is just a new skin which you can change at the camp fires. However, it does not reflect the injuries Lara receives (unlike her default skin) so it is very immersion breaking. But it is part of the GOTY edition so you could get this through buying that version. ----- If you liked this DLC review you can find more in my Review Corner .. Lara looks great in her classic 1930s adventurer, bomber jacket and all, she's

just missing the hat indiana style. best looking skin out the dlc's. This reminds me of Alan Wake, looking for treasures in ghostly tombs.
